

# 10 kw lithium battery Argentina

Where will lithium batteries be made in Buenos Aires?

State company Y-TEC, the tech arm of YPF, will open the first lithium battery cell factory in September, in La Plata, the capital of Buenos Aires province. Another plant, five times bigger, will kick off in Santiago del Estero in 2024.

Will a new Lithium Project churn out in Argentina?

Four new projects will finally begin to churn out lithium in the weeks and months ahead, according to a yet-to-be released federal government time-line seen by Bloomberg News. That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world.

Does Y-TEC sell lithium in Argentina?

In the case of lithium, Y-TEC signed a contract with American company Livent, which extracts the mineral in Catamarca and, for the first time, sold part of its production in Argentina. According to Salvarezza, for industrialization to grow in scale, part of the production ought to be sold on the local market.

Will a new lithium mine come on stream in Argentina?

That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world. For all the money that's poured into Argentina's giant lithium deposits, the country has seen just one new mine come on stream in almost a decade. That's about to change.

Where will lithium batteries be made?

The lithium batteries' cell manufacturing plant in Berisso, La Plata, will open in September, an event top government officials are expected to attend. The plant will generate 15 megawatts per year, which means it will produce lithium batteries capable of powering 2500 households. The batteries are envisaged for use in rural areas.

Will a new Lithium Project churn out more lithium?

Four new projects will finally begin to churn out lithium in the weeks and months ahead. That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world.

Taking advantage of the strong liquidity of the Group to execute the transaction, we will soon become the first Western company using a next-generation DLE technology to produce battery-grade lithium carbonate ...

Argentina plans to start producing battery cells for electric cars in September 2023. The production plant, built by the state-owned energy research company Y-TEC, will use lithium carbonate extracted from Livent in ...

Argentina was the world's fourth-biggest producer of lithium in 2023, after Australia, Chile and China, according to the USGS. In July, the French mining group Eramet and its Chinese partner Tsingshan opened a lithium production plant in Salta. Eramet chief executive Christel Bories said the plant would meet 15 percent of Europe's lithium needs.

Argentina currently has three operational plants to produce lithium carbonate, the key component of lithium-ion batteries. But as many as 38 projects concentrated in the country's north-west are in the exploratory stage and could start production in the next five years.

Rio Tinto buys Arcadium Lithium . The mining company announced in October that it had acquired Arcadium Lithium for US\$6.7 billion in cash. Globally, Arcadium has 1,300 employees, manages resources in Argentina and Australia, and operates conversion plants in the U.S., China, Japan, and the United Kingdom. It also has production projects in Canada.

Taking advantage of the strong liquidity of the Group to execute the transaction, we will soon become the first

## 10 kw lithium battery Argentina

Western company using a next-generation DLE technology to produce battery-grade lithium carbonate at industrial scale, confirming our technological and sustainable leadership across the entire lithium value chain.
