

The future of our planet is dependent on clean, renewable and resilient energy. That's why we've channelled our engineering expertise into solutions for energy storage and power conversion that can make a genuine impact.

Rimac Energy has announced that its first SineStack battery energy storage system is ready for deployment at a site in Colchester, UK. The SineStack completed its commissioning phase and is designed to maximise performance, safety, and reliability. Built on a novel electrical architecture, SineStack integrates advanced power conversion technology with ...

Rimac Energy is deploying its first pilot projects after announcing its entry into the energy storage system (ESS) market one year ago, and we caught up with its head of business development while at the Energy ...

Rimac Technology has announced its entry into the stationary energy storage systems (ESS) market with Rimac Energy, introducing stationary energy storage systems to ...

Precise control of every module enables higher energy extraction per cycle. SineStack drives down the levelized cost of storage by combining a 12,000 cycle lifetime with a class-leading 92% round-trip efficiency.

Rimac Energy, the energy storage division of Croatian EV tech company Rimac, has launched its new flagship product, the SineStack. The advanced battery energy storage system (BESS) is now ready for deployment in Colchester. The SineStack features lithium iron phosphate (LFP) cells. It has an energy storage capacity of 790 kWh and an output of ...

The future of our planet is dependent on clean, renewable and resilient energy. That's why we've channelled our engineering expertise into solutions for energy storage and power conversion ...

With its Rimac Energy division focused on stationary energy storage systems, Rimac Technology is dedicated to advancing electric mobility and sustainable energy solutions. Ownership. 100%. Locations. 6. Employees . 1,100+ Production space* 45,000 m²;+ Explore rimac technology *Including warehouse.

The unit, called SineStack, is a lithium iron phosphate (LFP) cell-based modular BESS solution with an energy storage capacity of 790kWh and a 400kVa output.

Rimac Energy, a pioneer in highly integrated battery energy storage and power delivery systems, has announced that its first SineStack is now ready for deployment to a site in Colchester, UK.. SineStack incorporates game-changing power conversion technology that is highly integrated both physically and functionally with its battery cells.

Rimac Energy, the energy storage arm of electric vehicle (EV) technology company Rimac, has completed commissioning for its flagship SineStack, a grid-interfacing battery energy storage system (BESS).

Designed and manufactured in Europe, our battery storage solution is part of the clean energy revolution. Created to help make the grid resilient for the future.

Rimac Technology has announced its entry into the stationary energy storage systems (ESS) market with Rimac Energy, introducing stationary energy storage systems to drive the decarbonisation of energy networks.

Image: Rimac Group. Energy-Storage.news" publisher Solar Media will host the inaugural Energy Storage Summit Central Eastern Europe on 26-27 September this year. This event will bring together the region's leading ...

Croatia's Rimac Group said on Thursday that its fully-owned subsidiary Rimac Technology has a launched a new brand, Rimac Energy, leveraging its expertise in making electric vehicle technology to create stationary energy storage systems (ESS).

According to Mate Rimac, founder and CEO of Rimac Automobili, there is an urgent need for clean energy infrastructure to support the integration of renewable energy sources into the grid by providing storage and balancing ...
