Argentina has sharply accelerated the rate of bringing its solar power plants into operation. According to the national electricity operator CAMMESA, the capacity of photovoltaic panels put on stream nationwide went from 33 megawatts (MW) in 2022 to 262 MW in 2023.

La Secretaría de Energía reunió a referentes nacionales e internacionales en el Foro Smart Grids, una iniciativa para incorporar la tecnología digital a la gestión de la distribución eléctrica y conformar una matriz energética más competitiva.

Notable brands include Huawei at 40%, SMA at 13%, and Schneider at 10%, showcasing the diverse array of technologies powering Argentina's solar energy revolution. In terms of total installed renewable capacity, Argentina boasts 16,782 MW, with large hydroelectric plants dominating at 64.5%.

Los paneles solares caseros requieren una inversión inicial considerable, pero son una alternativa atractiva a la hora de reducir lo que pagamos cada mes por la electricidad, y la inversión se ...

¿Preocupado por tu consumo energético? Instalá paneles solares en tu hogar y generá tu propia energía de manera eficiente y sustentable. Conocé nuestros productos.

The Cauchari Solar Plant is just the start for Argentina, which is starting to really shift to using more renewable energy sources.

The electricity grid of Argentina, one of the biggest of the region, has started its evolution to the smart grid by means of many independent and not coordinated pilot projects spread across its geography.

Argentina has taken another step towards the future of renewable energy. All thanks to the inauguration of the largest photovoltaic plant in South America. Located in the Puna of Jujuy, the Cauchari plant has been equipped with more than 900 thousand solar panels that will occupy 600 hectares in the town of Susques, about 4200 meters above sea ...
