

How will EnergyAustralia invest in energy storage and renewables firming?

Deployment of over \$5 billion in capital by EnergyAustralia and partners in energy storage and renewables firming initiatives, including 665MW of renewables firming already under construction. This will occur through a combination of direct investment, Power Purchase Agreements, Storage Agreements and Consumer Energy Resources.

What is EnergyAustralia's CTAP?

EnergyAustralia Managing Director Mark Collette said: "EnergyAustralia's purpose is to lead and accelerate the clean energy transformation for all. Our CTAP is a milestone on our journey to reach Net Zero by 2050. The plan demonstrates we understand the size and complexity of the task for EnergyAustralia and for Australia as a whole.

Are renewables the future of Australia's electricity mix?

Renewables already account for 35 per cent of Australia's electricity mix. 2 But, as our coal-fired power plants start to go offline over the next two decades, renewables and storage are necessarily going to have to carry an even greater share."

How many customers does simply energy have in Australia?

In Australia, the company has about 1,200MW of low-carbon generation capacity and more than 800MW of renewable energy under development. Our retail brand, Simply Energy, has more than 720,000 customer accounts in Victoria, South Australia, New South Wales, the Australian Capital Territory, Western Australia and Queensland.

Will Energy Australia achieve net zero by 2050?

EnergyAustralia today released its inaugural Climate Transition Action Plan (CTAP) setting out its plan to achieve Net Zero by 2050 across Scopes 1 and 2 emissions and its intention to develop a decarbonisation pathway for Scope 3 emissions by the end of 2024.
