

Is Azerbaijan a green energy exporter?

The country's President Ilham Aliyev signed a strategic agreement with Georgia, Hungary and Romania last week to leverage the national renewable energy resources to supply consumers in Europe. The president said Azerbaijan owns sufficient green energy resources, giving it the ability to enter the European marketplace as a new electricity exporter.

What is Azerbaijan's energy export policy?

Electricity export is a key part of Azerbaijani government's green energy policy. The country's authorities intend to increase the share of renewable energy sources in the country's overall energy production to 30 percent by 2030. To make this happen, Azerbaijan has adopted the Law on the Use of Renewable Energy Sources (RES).

Is Azerbaijan a 'crucial Energy partner' for the EU?

Speaking to reporters in Baku this morning, von der Leyen described Azerbaijan as a "crucial energy partner" for the EU and noted the urgency for the bloc "to diversify away from Russia and to turn to more reliable, trustworthy suppliers."

Does Azerbaijan supply natural gas to Europe?

Azerbaijan has been supplying natural gas to Europe via the Trans Adriatic Pipeline (TAP) since December 31, 2020. TAP forms a part of the Southern Gas Corridor (SGC) mega pipeline designed and built for increasing and diversifying European energy supplies.

Can Azerbaijan export electricity to Europe?

Azerbaijan has also proposed exporting electricity to Europe through what it calls the "Zangezur corridor," across Armenian territory to its Nakhchivan exclave and Turkey. But Baku and Yerevan have yet, two years after a ceasefire agreement, to agree on any terms for transportation links. Heydar Isayev contributed reporting.

Who is constructing solar PV projects in Azerbaijan?

The projects are developed in collaboration with Azerbaijan's state oil company SOCAR. Image: Masdar UAE state-owned renewable energy developer Masdar has started constructing two solar PV projects in Azerbaijan, with a combined capacity of 760MW.
