

Bahamas ess power system

Pictured is a new installation done by Island Solar Ltd. The PV panels on this off-grid system power the house and charge the 2 LFP-15 Fortress Power batteries during the day. In the evening, the Fortress batteries supply the power to the house until the sun comes out again the next day.

This week, Wärtsilä said it will supply a 25MW / 27MWh battery energy storage system (BESS) based on 27 units of its GridSolve Quantum BESS product that was launched last year. It is being combined with the existing Wärtsilä 132MW dual-fuel power plant at Bluehills Power Station in Nassau.

In April 2010 Optimal Power Solutions (OPS) commissioned a renewable energy-based Mini Grid in the Bahamas that combined photovoltaic, wind, diesel sources and energy storage facilities under the control of OPS Hybrid Power

BESS can work with decentralized or central systems, and has a plethora of other ancillary benefits, including most notably utilizing or distributing renewable energy such as from wind or solar systems, which will become increasingly important as BPL works more and more solar generation into its mix."
