

What type of energy is used in the Bahamas?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Bahamas: How much of the country's energy comes from nuclear power?

How will the Bahamas reform its energy sector?

The Government of the Bahamas has discussed plans to reform its energy sector through a partial-privatization of BEC and by introducing regulation-by-contract principles to meet the capacity for future growth, implementing more economically viable renewable energy sources, and modernizing the energy sector.

What is the energy efficiency initiative in the Bahamas?

With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership with the Government of the Bahamas to reduce energy-related costs.

Why is the Bahamas struggling to diversify its energy mix?

One of the key challenges facing The Bahamas in its quest to diversify its energy mix is the high cost of electricity, which is primarily driven by the country's reliance on imported oil for power generation.

How much does electricity cost in the Bahamas?

In fact, The Bahamas has one of the highest electricity rates in the Caribbean, with an average cost of around \$0.36 per kilowatt-hour (kWh) in 2019. This is significantly higher than the regional average of \$0.25 per kWh and has placed a considerable burden on both households and businesses.

Is biomass a source of electricity in the Bahamas?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Bahamas: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
