The Green Barbuda project is a hybrid solar, batteries and back-up diesel project, featuring a hybrid PV plant with 720 kWp of solar panels connected to a 863 kWh battery. It is capable of fully meeting the island's current daytime energy demand.

Best home backup power station Antigua and Barbuda

The project will see the installation of a completely new electricity power station, a 720 kWp solar photovoltaic facility, and an 863 kilowatt-hour (kWh) battery storage solution that will store and stabilize electricity from the solar plant. This will allow the renewable energy capacity to meet 100% of current daytime power requirements.
