

# Bonaire Sint Eustatius and Saba renewable energy storage batteries

The solar park and battery storage infrastructure, bolstered by the already operational 6 MW battery power at CGB, aim to mitigate energy production fluctuations, particularly during periods of low wind output.

In order to integrate more renewable energy and its intermittent nature, the W&#228;rtsil&#228;; energy storage solution will provide the grid stability and reliability required for the island. The energy storage solution will also prevent situations where generation from renewable sources would otherwise had to be curtailed.

In addition to supplying and installing the batteries, the company delivered the GEMS energy management software developed by its Greensmith Energy subsidiary. This software will balance Bonaire's resources and enhance the operation of its power production and energy storage assets, Wartsila said.

After a fire destroyed the island's sole generating station in 2004, Bonaire developed a plan to serve the island with 100% renewable energy from a single hybrid generating system.

Wartsila noted that the energy storage system will allow Bonaire to raise its use of renewable energy, providing grid stability and reliability for the island. The facility will integrate all of the island's existing power generation ...

In order to integrate more renewable energy and its intermittent nature, the W&#228;rtsil&#228;; energy storage solution will provide the grid stability and reliability required for the ...

Saba Electric Co. (SEC), an energy supplier on the Caribbean island of Saba, is seeking expressions of interest for a solar, wind and battery energy storage system. The ...

This document was developed by the National Renewable Energy Laboratory with support provided by the Caribbean Center for Renewable Energy and Energy Efficiency. The ...

Previously consisting of an integrated mix of wind power and diesel totalling 24 MW, the Bonaire power plant has now been equipped with 6-MW/6-MWh of lithium-ion batteries, a digital power management system and newly expanded dual-fuel engines.

This project is the beginning of a longer-term plan to fully modernise the island's energy system and to add additional capacity and renewable energy generation to the grid, while setting Bonaire on the path to ...

Prepared by the National Renewable Energy Laboratory (NREL), a national laboratory of the U.S. Department

## Bonaire Sint Eustatius and Saba renewable energy storage batteries

of Energy, Office of Energy Efficiency and Renewable Energy; NREL is operated by the Alliance for Sustainable Energy, LLC.

This project is the beginning of a longer-term plan to fully modernise the island's energy system and to add additional capacity and renewable energy generation to the grid, while setting Bonaire on the path to achieving its 100% renewable target without compromising on energy reliability.

Saba Electric Co. (SEC), an energy supplier on the Caribbean island of Saba, is seeking expressions of interest for a solar, wind and battery energy storage system. The deadline is Feb. 5,...
