

Why is Burundi launching a power generation master plan?

The project aims to support the development of a power generation master plan expected to highlight the various renewable energy options for Burundi in the 'power generation segment', paving the way for strong private sector participation which is critical for meeting the massive challenges of the power sector in the country.

How much power does Burundi have?

Furthermore, Burundi has only 39 MW of installed capacity, of which 95% is hydropower-based, and significant renewable energy potential still to be tapped.

Does Burundi have electricity?

Burundi's access to electricity (6%) is one of the lowest in Sub-Saharan Africa, even though the country's cost of generation (0.062 USD/kWh) is considered relatively low as compared to its neighboring countries.
