Places piers, elevates trackers to topography and rotates them to the land slope.

Which CAD program should I use for distributed generation solar projects?

This is a step - by - step guide through PVCAD, the first computer-aided design (CAD) program built for distributed generation solar projects. We recommend using PVCAD for all projects <5MW and PVCAD Mega for ground mounted projects >5MWs. PVCAD Mega has enhanced topographic features and allows you achieve scale on large projects much faster.

How does pvcad work?

PVCAD generates two dozen solar project-specific layers, including system components, setbacks, shadows, wind zones and much more. Create additional layers of your own as needed. Using the AutoCAD command input you can access numerous common and complex features of PVCAD and PVCAD Mega.
