

Can photovoltaic panels be installed for free in self-built houses

Should you use solar panels when building a new home?

Today, when building a new home, it is required that you include energy saving measures and offsets such as cheap new build solar panels. These include solar panels or solar thermal systems. Solar panels do not need to detract from the attractiveness of your new build.

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Can solar panels be added to a new build?

For new builds and self-builds, you'll likely be looking at solar photovoltaic panels and/or solar hot water (solar thermal) systems. Instead of looking at options to traditional heating systems, solar panel installations can be added to new builds to improve the EPC and overall energy efficiency.

Can I get solar panels installed in my home?

There's help available to get solar panels installed in your home, but you usually need to be on certain benefits or have a low income to be eligible. What each scheme offers, and its eligibility criteria varies: The Energy Company Obligation (ECO) scheme.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.
