

Cayman Islands solar power to run a house

What is the first commercial solar project in Cayman?

The 20 acre 5MW Solar Farm located in Bodden Town is the first commercial solar project in Cayman. Completed in 2017, this solar farm was also the first Independent Power Producer (IPP) in Grand Cayman, selling electricity to CUC through a Power Purchase Agreement (PPA).

Are solar panels duty-free in Cayman?

However, renewable energy equipment, such as solar panels, are in fact duty-free for residential homeowners. Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

How does CUC power a solar power plant in Grand Cayman?

The fuel is transferred by pipeline from suppliers' tanker terminals to CUC's centralised generating Power Plant located on the outskirts of George Town. In 2017, CUC commissioned Grand Cayman's first commercial solar project.

How much does electricity cost in Cayman Islands?

Cayman Islands, March 2023: The price of electricity is 0.414 U.S. Dollar per kWh for households and 0.376 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

Who produces electricity in the Cayman Islands?

Electricity in the Cayman Islands is produced by the Caribbean Utilities Company, Ltd, which relies on imported diesel fuels. Caribbean Utilities Company, Ltd has 17 diesel units, one gas turbine, and two steam turbines to produce electricity. CUC generating unit boasts of 161 MW.

Renewables experts have asked the government to allow Cayman residents to install solar and battery energy storage systems at their homes or businesses without prior permission.

Switching over to solar can significantly reduce your carbon footprint and help combat climate change, not only for yourself but for the entire Cayman Islands too. Our beloved islands' footprint is unfortunately still over 97% fossil, so act and accelerate our way to eco-friendliness.
