

How do the Cocos (Keeling) Islands communicate?

The Cocos (Keeling) Islands have access to a range of modern communication services. Digital television stations are broadcast from Western Australia via satellite. A local radio station, 6CKI - Voice of the Cocos (Keeling) Islands, is staffed by community volunteers and provides some local content.

Why are the Cocos Islands called the Keeling Islands?

The territory's dual name (official since the islands' incorporation into Australia in 1955) reflects that the islands have historically been known as either the Cocos Islands or the Keeling Islands. The territory consists of two atolls made up of 27 coral islands, of which only two - West Island and Home Island - are inhabited.

Who discovered the Cocos Keeling Islands?

Discovered in 1609 by British sea captain William Keeling, the Cocos Keeling Islands remained uninhabited until the early 19th century. Scottish merchant John Clunies-Ross was one of the first to settle here, setting up a copra plantation with Malay workers. Until today, coconuts are grown throughout the islands and are the sole cash crop.

Is there plastic pollution on the Cocos (Keeling) Islands?

“Significant plastic accumulation on the Cocos (Keeling) Islands, Australia” Scientific Reports. 9 (Article number 7102): 7102. Bibcode: 2019NatSR...9.7102L. doi: 10.1038/s41598-019-43375-4. PMC 6522509. PMID 31097730. ^ McGrath, Matt (16 May 2019). “Plastic pollution: Flip-flop tide engulfs 'paradise' island” BBC News. Retrieved 7 October 2019.

How do you get to the Cocos (Keeling) Islands?

Just don't do both." Unless you have a yacht and a lot of time, or your own plane, the only way to the Cocos (Keeling) Islands is a twice-weekly Virgin flight out of Perth in Western Australia. Only about 4,000 tourists made it here in all of last year.

What is the climate like in Cocos Islands?

These lenses are accessed through shallow bores or wells. Cocos (Keeling) Islands experience a tropical rainforest climate (Af) according to the Köppen climate classification; the archipelago lies approximately midway between the equator and the Tropic of Capricorn. The archipelago has two distinct seasons, the wet season and the dry season.

The Cocos are relatively new -- "there wouldn't have been much here when Jesus was walking," I'm told -- but parrotfish have been busy since, pooing enough coral sand for 27 islands.
