Constantine Energy Storage (CES) was founded in 2022 as a platform to construct, own and operate best in class institutional grade battery energy storage systems (BESS). As the country's energy system decarbonises, BESS is needed to help balance the system and supply key services to ensure safe and reliable energy supply across the grid network.

Energy storage is simply the ability to capture energy for use later. As we transition the world from a power system using fossil fuels, where energy is stored within the fuels themselves, to one using renewables, the requirement for energy storage increases.

The company invests in energy storage projects, enabling its clients to improve battery energy storage capabilities and enhance energy security. Contact Information Website

We are building out a portfolio of battery energy storage systems across the country. As the country's energy system decarbonises, energy storage is needed to help balance the system and supply key services to ensure safe and reliable supply.

Mike is the Commercial Director for Constantine Energy Storage. Constantine Energy Storage are constructing and managing a portfolio of over 3GWh of utility scale storage assets. Prior to this Mike [...]
