

A 5 MW battery storage facility and the new power capacitor in Slovenia are part of the smart grids solutions within the Sincro.Grid project with Croatia. Sincro.Grid said construction works have started in Pekre near Maribor on the installation of a battery system with a capacity of 5 MW and storage time of five hours, translating to 25 MWh.

Lenovo Software-Defined Storage. Built on industry-leading Lenovo ThinkSystem servers, Lenovo software-defined storage solutions support a wide range of use cases, including large scale ...

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it would be the biggest in Southeastern Europe.

The aim of INSULAE is to foster the deployment of innovative solutions for the decarbonization of EU islands by developing and demonstrating a set of interventions linked to seven replicable ...

ATESS has made substantial strides in supporting Croatia's industrial sector with cutting-edge energy storage solutions. By implementing energy storage systems across four diverse factories, ATESS is addressing key challenges and aligning with Croatia's energy transition goals.

Croatian state energy company Hrvatska Elektroprivreda (HEP) has launched a tender for the purchase of smart meters worth EUR86.5 million (\$95.6 million).

The aim of INSULAE is to foster the deployment of innovative solutions for the decarbonization of EU islands by developing and demonstrating a set of interventions linked to seven replicable use cases on three Lighthouse Islands located in Croatia, in Denmark and in Portugal.

1 ??&#0183; Now is the time to consider any custom organization features that are tailored to your needs. To help you explore your design options, we've rounded up some useful built-in storage solutions for you to consider when remodeling ...

The Slovenia-headquartered company was recently in the news for a 20MWh project it commissioned in Austria, which is the country's largest, and it is deploying the largest battery storage systems in neighbouring Slovenia and Croatia, totalling 70MW/140MWh and 50MW/100MWh respectively.

A 5 MW battery storage facility and the new power capacitor in Slovenia are part of the smart grids solutions within the Sincro.Grid project with Croatia. Sincro.Grid said construction works have started in Pekre near ...

Developer NGEN is deploying the largest battery storage units in Slovenia, Austria and Croatia, and wants to take its model beyond CEE too.

Vertical storage solutions can also easily solve this problem, as they automatically deliver parts to the picker, rather than having the picker go and locate the parts ...

Project "Grid scale smart energy storage" (ref: MF-2022-2-HR-0-004) The project contributes to improving energy security and decrease of GHG emissions from the energy sector by ...

The goal of the Call is to facilitate the deployment of 20MWh of energy storage and 80MW of renewable energy projects. It is also targeting energy efficiency projects totalling 140,000MWh of energy a year, and has the overall goal of reducing CO2 emissions by 60,000 tonnes annually.

The goal of the Call is to facilitate the deployment of 20MWh of energy storage and 80MW of renewable energy projects. It is also targeting energy efficiency projects totalling 140,000MWh of energy a year, and has the ...

ATESS has made substantial strides in supporting Croatia's industrial sector with cutting-edge energy storage solutions. By implementing energy storage systems across four ...
