

Energy is responsible for the majority of climate change-causing greenhouse gas emissions, mostly from the burning of fossil fuels. Despite efforts to reduce these emissions, the trajectory of CO2 emissions globally remains far higher than what is needed to avoid the worst effects of climate change.

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under ...

Partnership with Trident Energy (led by former CEO of Perenco and funded by Warburg Pincus) who will act as production operator with Kosmos as exploration operator

Despite Exxon's history of doing business in Equatorial Guinea for almost three decades, the company decided to cut its losses altogether after a safety incident in 2022 decimated its output.

The government of Equatorial Guinea is said to be aiming for a joint development whereby gas will be exported to the EG LNG and condensate to a local refinery in Cameroon. The planned Alen export pipeline has sufficient capacity to support supply from both Blocks O & I as well as from Yoyo/Yolanda.
