

During the years of the energy crisis, solar accelerated its growth to reduce dependency on Russia's gas and shield EU citizens" from power price hikes. In 2023, the European solar ...

The European Solar Charter was signed on 15 April 2024 in Brussels. Drafted by the European Commission, the signatories of the Charter commit to the support of Europe's ...

In the short-term, we can accelerate existing projects already in the pipeline to ensure completion by end of 2022, identify go-to areas for additional solar & storage projects, ...

The severity of climate change and the urgency of ecological environment protection make the transformation of coal power imperative. In this paper, the relevant policies of coal-biomass co-firing power generation are ...

Making green greener: Bio-based solar panels for smart buildings. A Spanish company has developed the world"s first bio-based photovoltaic module that works without sunlight or battery consumption. This ...

The countries where solar is rapidly taking off tend to be smaller and concentrated in Eastern Europe. Poland has increased its solar generation since 2018 by a ...

Top solar projects list of 2023 using solar power from floating solar panels to solar seawater desalinators and solar drones by nevonprojects

A 4-year research project with over 12 million euro in grant value from the European Union's Horizon 2020 programme, TRUST-PV will improve the performance and reliability of solar ...

Low-power waste-to-energy conversion plants are considered a solution to the problem of energy security in isolated areas while problems such as unstable renewable energy generation during peak hours and the ...

Prometeo is a European Horizon 2020 project that aims to design, construct and test an innovative prototype to produce renewable hydrogen from solar power. ... This project has received funding from the Fuel Cells and Hydrogen 2 Joint ...

The European Research Infrastructure for Concentrated Solar Power /Solar Thermal Energy Concentrating solar technologies for electricity and industrial process heat generation may ...

In the past two decades, clean energy such as hydro, wind, and solar power has achieved significant development under the "green recovery" global goal, and it may ...

Unlocking flexibility solutions enables further PV deployment, resulting in additional solar electricity into the EU power mix. Solar capacity exceeds 1.2 TW in 2030 and 2.4 TW in 2040, ...

(IN BRIEF) The European Investment Bank (EIB) and Matrix Renewables have secured a EUR50 million green loan to develop five new solar photovoltaic plants in Castilla y ...

December 3 - December 4 in Lille, France BioFit - 13th Edition. With the highest attending rate of TTOs, research institutes and academia together with big pharma, emerging and small ...

POWERBASE, funded by the EU, industry and some national and regional entities, has developed the next generation of energy-efficient power semiconductors, using gallium nitride ...
