

Extreme solar Pakistan

Are solar panels 'unaffordable' in Pakistan?

But the mass adoption of solar panels also risked making the power provided by the Pakistani grid "unaffordable", Awaiz Leghari, the energy minister, told the Financial Times. "Demand is shrinking off the grid. That's a big concern for us."

Will Pakistan give away free solar panels?

Despite the federal government's concern about its power network, the provincial government of Punjab, home to more than half of Pakistan's 240mn population, announced in July that it would give away free or heavily subsidised solar panels for millions of citizens struggling with rising electricity bills.

Why is Akhtar importing solar panels from China?

Akhtar is now ploughing a chunk of last year's profits into importing another haul of panels from China to lift the share of solar supply to his operations to 80 per cent by next April, to blunt the impact of soaring tariffs for state-provided power. "It's the only way we can beat our competitors" in China and India, he said.

Which multinational companies are importing solar panels from China?

Irteza Ubaid, chief operating officer of Shams Power, a Lahore-based importer, said that multinational companies in Pakistan, including Coca-Cola, Mondelez and Hyundai, are gobbling up the panels he imports from China, as they chase savings of up to 70 per cent on their electricity bills.

Are solar panels a problem for low-income consumers?

A remaining estimated 30mn low-income consumers who cannot afford the new solar panels or lack the rooftop space now face rocketing prices for the state-owned power supply. Local industrial groups complain that energy costs are double those of businesses in India and Bangladesh.

Why are some factories shutting down in Pakistan?

Some factories have been forced to shut even as the Pakistani government seeks to boost exports to transform the import-dependent, boom-and-bust economy. Jenny Chase, lead solar analyst at BloombergNEF, said the cost of panels has halved to about 10 cents per watt, from 24 cents last year.

Pakistan has grown its solar energy capacity by an astounding amount in a remarkably short space of time. The shock surge has given residents the power to survive ...

Sky-high power prices are fueling a massive solar buildout in Pakistan. Solar imports from China so far this year have already outstripped imports across all of last year, Bloomberg reports. Panels purchased in 2024 amount to 17 gigawatts of capacity, enough to raise Pakistan's total power capacity by a third.

Unlike solar flares, which travel at the speed of light and reach Earth in around eight minutes, CMEs travel at
