

Faroe Islands home assistant enphase dashboard

Does Enphase support home assistant?

While Enphase doesn't officially support Home Assistant, there is a great integration built into the core that is relatively well maintained. Over the following sections, we will walk you through the process of connecting your Enphase power system to Home Assistant. We will also show you how to add Enphase to the Home Assistant energy dashboard.

Which Enphase sensor works with energy dashboard?

For 'Solar Production', the `today_s_ENERGY_production` sensor is the ONLY enphase sensor that will work with energy dashboard by default without modifying home assistant and creating extra power and energy sensors. This is due to the `state_class: total_increasing` attribute that ONLY this sensor appears to have.

How do I connect Enphase envoy to home assistant?

The Envoy must be on your local network with IPV4 connectivity from Home Assistant. Envoy firmware version 3.9 or newer. an Enlighten cloud username and password. Home Assistant 2023.9 or newer. To add the Enphase Envoy integration to your Home Assistant instance, use this My button: Enphase Envoy can be auto-discovered by Home Assistant.

How long does Enphase data take to show up?

31. With all your Enphase data now being piped into the Home Assistant Energy dashboard, you will have to wait two hours before anything is displayed. Below, you can see what this data might start to look like as Home Assistant aggregates all of the data.

Can home assistant use Enphase battery charge & discharge power?

Our two helpers now give Home Assistant the Enphase battery charge and discharge power. However, to be usable within the Energy Dashboard, we must convert these values from power to energy. Energy is essentially a way of expressing your power over a period of time.

Can Enphase envoy be auto-discovered?

Enphase Envoy can be auto-discovered by Home Assistant. If an instance was found, it will be shown as Discovered. You can then set it up right away. This integration will offer various sensors depending on the configuration of your Enphase system. Sensors are available for the following:

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi or a local server. Available for free at home-assistant.io.
