Faza solar Trinidad and Tobago

A consortium involving oil groups BP Plc (LON:BP) and Shell plc (LON:SHEL) has made a final investment decision (FID) on a 112-MW AC/148-MWp solar project in Trinidad and Tobago after reaching an agreement with the government of the Caribbean island country.

The solar project is being constructed by a consortium made up of bp Alternative Energy Trinidad and Tobago (bpATT) and Shell Renewables Caribbean (Shell). Lightsource bp is the construction manager for the project. The project is expected to produce approximately 300,000MWh of green electricity per year.

According to Lightsource bp, it is the first utility-scale solar project for the Caribbean island nation. Once up and running, the solar farm will generate around 300 GWh of electricity per year, or enough to power some 42,500 Trinidadian homes, the press release reads.

The Solar PV Project is set to be the first utility scale renewable power generation facility within Trinidad and Tobago, set to deliver 112.2MW onto the grid. The arrival to this point is a testimony of the Government's steadfast commitment to decarbonizing the power sector and represents an energy milestone as we create a new energy mix to ...
