

How is Gabon approaching energy planning?

To achieve climate agreements, and meet its growing energy demands, Gabon is approaching energy planning through a different process. News & Commentary Features/Analysis News Industry Sectors Generation Transmission and Distribution Metering Finance and Policy Climate Change Renewable energy Bio-energy Geothermal Hydropower Solar Wind

What are the main sources of energy in Gabon?

(October 2009) Energy in Gabon comes from two main sources, fossil-fuels and hydroelectricity. Gabon also relies heavily on oil for its export revenues, exporting both crude oil and petroleum. In terms of its oil reserves, the country is one of the richest in sub-Saharan Africa, ranking 5th after Nigeria, Angola, Sudan, South Sudan, and Uganda.

How much electricity does Gabon produce?

Gabon's total electricity production in 2015 was 199 kilotonne of oil equivalent (ktoe), with 51.7% produced from hydropower sources and 48.2% from fossil fuels. The country's final consumption of electricity was 169 ktoe.

Who controls the oil industry in Gabon?

The government of Gabon controls all petroleum and mineral rights within the state. In 2011 a presidential decree created the Gabon Oil Company (GOC). This new entity works in partnership with international companies operating in Gabon and operates two fields: Obangue and Remboue.

Does Gabon have a partnership with the Nature Conservancy?

The Gabonese State has signed a partnership agreement with The Nature Conservancy, an international conservation organisation operating in Gabon, to provide support on questions relating to the environmental impacts of new energy projects.

What challenges does Gabon face?

As a would-be emerging nation looking at diversifying and sustainably growing its economy, Gabon faces the challenge of simultaneously meeting increasing energy demand to improve socioeconomic conditions and protecting biodiversity and resilient ecosystem services into the future.
