

How does Gea contribute to a sustainable future?

GEA makes an important contribution to a sustainable future with its solutions and services, particularly in the food, beverage and pharmaceutical sectors.

Does South Africa need gas?

South Africa continues to dominate coal production in Africa. Despite declining production, falling domestic demand boosts export volumes in both scenarios. South Africa also relies on oil and gas for its energy needs, but recent gas discoveries could reduce its import needs.

What is Africa Energy Outlook 2019?

Africa Energy Outlook 2019 is the IEA's most comprehensive and detailed work to date on energy across the African continent, with a particular emphasis on sub-Saharan Africa. It includes detailed energy profiles of 11 countries that represent three-quarters of the region's gross domestic product and energy demand.

Energy Efficiency in a North-Facing Building: In South Africa, a north-facing building benefits from natural sunlight, reducing the heating load. Water-based systems excel in harnessing this...

In South Africa, GEA Aircooled Systems was founded 1975 to design, manufacture and service large contracts awarded by the power and petrochemical industries. Following a total technology transfer from the German parent company, the local GEA subsidiary became largely independent.
