

How does the EU and Greenland work together?

The EU and Greenland are now broadening cooperation to the area of green growth with support to renewable energy (especially Power-to-X applications, such as hydrogen production), to biodiversity protection, research coordination as well as to critical raw materials (CRM).

Is Greenland a potential E-Fuels hub?

Greenland's transition from a fossil fuels-based system to a 100% renewable energy system between 2019 and 2050 and its position as a potential e-fuels and e-chemicals production hub for Europe, Japan, and South Korea, has been investigated in this study using the EnergyPLAN model.

How will the EU support Greenland?

and digital transition. The EU will support Greenland in developing high value added activities along the supply chain while ensuring the highest sustainable environmental protection. About 80% of Greenland is covered by an ice sheet, making it especially vulnerable to the

Is Greenland a member of the EU?

This allows Greenlanders to move and reside freely within the EU. Greenland joined the then European Community in 1973 as a county along with Denmark, but after gaining autonomy in 1979 with the introduction of home rule within the Kingdom of Denmark, Greenland voted to leave in 1982 and left in 1985, to become an OCT.

How does the EU support Greenland in the Arctic?

Arctic strategy. The EU supports Greenland in ensuring that the Arctic remains a safe and peaceful space for its people, science and cooperation. The EU Office in Nuuk will be a concrete European presence in the Arctic, an increased partnership agreement. Fisheries account for over 90%

Does Greenland supply E-fuel?

This study assumes that Greenland only partially supplies e-fuel and e-chemical demand of importers. All scenarios include Greenland's domestic energy demand. The list of scenarios is as follows: "Steady Europe": In 2030, 1.65% of European demand for liquid hydrocarbons is included, in addition to 5% of European demand for e-ammonia and e-methanol.

Greenland has joined the Association of the Overseas Countries and Territories of the European Union. It was founded on November 17, 2000, during the conference of prime ministers of overseas countries and territories in Brussels, Belgium.

Greenland's transition from a fossil fuels-based system to a 100% renewable energy system between 2019 and 2050 and its position as a potential e-fuels and e-chemicals ...
