

Growatt PV Inverter Model

What is a Growatt inverter?

Growatt inverters are extensively used worldwide for applications in residential, commercial, PV poverty alleviation, utility-scale scenarios as well as other storage power station projects. If you are interested in our Growatt inverters and want to know more details, please leave a message here, we will reply you as soon as we can.

Are Growatt solar inverters compatible with three-phase electricity supplies?

These Growatt solar inverters are compatible with three-phase electricity supplies of residential and small commercial buildings. The 7000-11000 TL3-S range includes solar inverters that are able to handle more power than the 3000-6000 TL3-S range.

What is a Growatt SP2000 solar inverter?

Unlike other solar inverters, the Growatt SP2000 also acts as a solar battery, storing excess solar energy generated by the panels for use at a later time. The lithium battery holds on to the DC electricity sent down by the solar panels. The total storage capacity is 5 kW, with 4 kW available for use around the home.

Are Growatt inverters safe for use?

Growatt inverters are built according to all required safety rules. They are safe for use, but improper use of the units and other property, as well as aggregated installations above 30 kW on a single Point of Common Connection, can pose risks. The inverters convert DC power from PV panels to AC current for grid connection and control the current accordingly.

What is Growatt solar & storage?

Growatt's 'Solar +Storage' package solution offers versatile applications, ranging from new installations to retrofits, and catering to residential ESS, micro-grids, portable power supplies, and more. Growatt's smart EV charger can be used in various scenarios including residential and commercial.

Can a Growatt inverter be connected to 240VAC?

The Growatt inverter is factory set for utility interconnection with 240VAC. However, you can change the setting through the LCD to fit different utility configuration types. It is possible to connect the inverter to 240VAC based on local grid standards.

According to S&P Global's latest release of its PV Inverter Market Tracker, Growatt is the world's no.1 residential PV inverter exporter by shipments in 2022, which offers ...
