

# Hazelwood Bess Central African Republic

What is Hazelwood Bess?

Jointly funded and developed by ENGIE and Eku Energy, the 150 MW/150 MWh Hazelwood BESS is Australia's largest privately funded utility-scale battery.

What's going on at Hazelwood coal power station?

A 150MW Battery Energy Storage System (BESS) is being developed at the former site of Hazelwood, a coal power station in Victoria, Australia. GIG is working with energy storage system integrator Fluence on this project. Image: Fluence via Twitter (Pictured is a rendering of the site's BESS, currently under construction).

Is Hazelwood a new era in Australia's energy transition?

Marking a new era in Australia's energy transition, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia and represents a key moment in repurposing former thermal assets for renewable energy technologies.

Is Hazelwood Australia's first coal-fired power station?

Hazelwood is Australia's first retired coal-fired power station to host a utility-scale battery

Why is the Hazelwood Power Station important?

It will play a critical role in increasing renewable energy capacity in Victoria while delivering essential system services to the grid. The Hazelwood Power Station was built in the 1960s and closed in 2017 after 50 years of service, in line with ENGIE's global strategy to be Net Zero carbon by 2045.

Why should you invest in Hazelwood?

Due to transmission and available space at site, Hazelwood is the perfect location for an asset that can grow in depth and duration, increasing the hosting capacity for renewables."Daniel Burrows, Chief Investment Officer and Head of Asia Pacific, Eku Energy said, "The Hazelwood battery is an example of how strong partnerships can support

GIG is working with energy storage system integrator Fluence to put a 150MW BESS at the former site of Hazelwood, a coal power station in Victoria, Australia. Pictured is a ...
