

Hospital Solar Power Generation Project

Which UK hospitals are solar powered?

Castle Hill Hospital in Cottingham, East Yorkshire has become the first hospital in the UK to be completely powered by its own renewable energy in daylight hours. In September 2021, Hull University Teaching Hospitals NHS Trust started installing solar panels on land next to the hospital site.

Why do NHS hospitals need a solar system?

Solar installations are a key component of these efforts, furthering the NHS's mission to create a greener, healthier future for all. NHS hospitals across the North East and Yorkshire region are harnessing the power of the sun to meet their energy needs and reduce their carbon footprint.

Could solar power save hospitals £480,000 in energy costs?

Officials had originally hoped the farm serving Morriston Hospital in Swansea would save about £480,000 in energy costs. But the rise in the electricity price mean that is now closer to £1m. Welsh NHS chief executive Judith Paget said more hospitals across Wales were "exploring the possibility of solar power".

Does Hull University Teaching Hospitals NHS Trust have solar panels?

Hull University Teaching Hospitals NHS Trust began installing solar panels on land adjacent to the hospital site in September 2021. It took five months to install, but now a local hospital trust's investment in solar technology is paying dividends.

How many solar panels have been installed across the hospital?

The first phase of the work has been completed with more than 2,500 solar panels installed across the hospital, producing 853MWh which is equivalent to powering over 200 average homes for a year or around 8% of the Trust's total electricity requirement.

Could a hospital trust invest in solar?

It took five months to install, but now a local hospital trust's investment in solar technology is paying dividends. The project, which quickly became known as the 'Field of Dreams', saw 11,000 panels installed at a cost of £4.2m in order that the Trust could begin to lower its carbon footprint and generate its own electricity.
