

How to withdraw money from solar power generation

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How much will I be paid if I sell solar power?

The amount you'll be paid for selling solar power back to the National Grid through the Smart Export Guarantee will vary depending on the tariff you choose. It could be between 1p/kWh to 24p/kWh- the best rate available at the time of writing. Rates do change, though, so it's always worth looking at the latest tariffs.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

What happens if you export solar power back to the grid?

If you have solar panels exporting electricity back to the grid, the SEG tariffs will generally be transferred to the new owner- another important selling point. Solar energy technology has advanced dramatically in recent years, making solar power more accessible and affordable. And these developments and improvements will intensify in the future.

How can solar energy save you money?

Advances in solar technology have also seen the introduction of solar battery storage systems. Storing energy from solar panels in a solar battery can save householders hundreds of pounds a year. These batteries reduce reliance on the National Grid by continuing to power homes long after the sun has set. This can cut electricity bills by up to 90%.

Do solar panels save money?

Selling electricity back to the grid is by no means the only benefit of solar panels. According to the Energy Saving Trust, solar panels were cutting home energy bills by up to 70% in 2023. How much money you'll save depends on the size of your solar system and how much electricity you use.

Ofgem regulation seems to state that, as long as your generating capacity is below the stated limits for eligibility for the scheme, you can sell as much unused electricity back to the National ...
