Who supplies marine fuels in Sri Lanka?

IOE's swift service and reliability makes it the company of choice for vessels seeking supplies. IOE supplies the below marine fuels in Sri Lanka: The above products meet the requirements of the ISO 8217-2005 standards and are supplied in compliance with the relevant ISO standard. The delivery procedure is in accordance with Marpol guidelines.

Does Sri Lanka have a power grid?

Sri Lanka has already achieved a grid connectivity of 98 percent, which is relatively high by South Asian standards. Electricity in Sri Lanka is generated using three primary sources: thermal power (which includes coal and fuel oil), hydropower, and other non-conventional renewable energy sources (solar power and wind power).

How much electricity does Sri Lanka need?

From 2018 - 2037, Sri Lanka plans to add 842 MW of major hydro, 215 MW of mini hydro, 1,389 MW of solar, 1,205 MW of wind, 85 MW of biomass, 425 MW of oil-based power, 1,500 MW of natural gas and 2,700 MW of coal power into the electricity generation system. The annual total electricity demand is about 14,150 gigawatt hours (GWH).

Should Sri Lanka use water bodies for solar power generation?

With limited land availability for traditional solar installations, utilizing water bodies for solar power generation presents a smart and innovative solution. This strategy supports Sri Lanka's ambitious national goal of generating 70% of its electricity from renewable sources by 2030.

Can agrivoltaics improve food security and energy access in Sri Lanka?

Agrivoltaics offers a unique opportunity to address both energy security in a land constrained country like Sri Lanka and its agricultural challenges. This project will serve as a model for wider applications for achieving sustainable food security and energy access in the country.

Sri Lanka's primary energy supply is mainly generated by coal. However, 23% of the total energy consumed in the country comes from modern renewable sources, the most commonly used being hydropower.
