

Ireland energy infrastructure company

What is Ireland's Energy Hub?

Ireland's Energy Hub, located around Cork Harbour, comprises the country's most strategically important cluster of energy infrastructure, businesses and research facilities. The Energy Hub supplies over 25% of Ireland's energy demands, is home to 20% of Ireland's electricity generating capacity and the country's only oil refinery.

What will SSE Renewables do for Ireland?

SSE Renewables is also focused on delivering the 800MW Arklow Bank Wind Park 2, an offshore wind project which can make a vital contribution to Ireland's 2030 climate action target. A planning application for the project was submitted earlier this summer, and SSE is currently awaiting a decision from An Bord Pleanála.

Does Ireland have a wind farm?

For Ireland - a country with a total maritime area more than seven times the size of its landmass - offshore wind can play a significant role in its renewable energy journey. With 300 wind farms generating close to 4.8 GW of clean energy, Ireland is third in the world for installed wind power capacity per capita.

Is Ireland a good place to invest in wind power?

With 300 wind farms generating close to 4.8 GW of clean energy, Ireland is third in the world for installed wind power capacity per capita. Presenting itself as a prime location for many of the world's leading offshore wind players with its strong infrastructure and sturdy support framework, Ireland has become a hive of activity in this space.

What is Ireland's high-voltage electricity grid?

We plan, manage and develop Ireland's high-voltage electricity grid for a sustainable future. This grid is connected to the lower voltage distribution system managed by ESB Networks, Ireland's Distribution System Operator (DSO), which supplies power directly to homes and business around the country.

How does SSE support Ireland's energy future?

Between graduates, office-based and skilled specialists, SSE continues to invest in the people required to deliver Ireland's energy future. More broadly, 3,270 jobs across Ireland were supported directly or indirectly by SSE last year - demonstrating the impact of its developments across the country.

The company engages in connecting renewable generation and increasing grid interconnection in mature markets, providing companies with transmission technology based on superconductors, requiring less infrastructure, materials, and space.

ESB Group invested more than EUR1 billion in critical energy to support National Climate Action Plan last

year. Chief executive Paddy Hayes details how the money was spent ...

EirGrid is leading Ireland's transition to a low carbon future. As we enhance the electricity system, we are delivering critical infrastructure that underpins greater energy independence, but as importantly, will create a better and sustainable ...

Ireland's Energy Hub, located around Cork Harbour, comprises the country's most strategically important cluster of energy infrastructure, businesses and research facilities. The Energy Hub ...

Preparing to produce up to 37GW of offshore energy by 2030 - and only requiring 20GW for its energy needs - this makes Ireland one of the few nations with a surplus of clean energy, accentuating the country's position as a key player in the global energy transition.

Ireland's Energy Hub, located around Cork Harbour, comprises the country's most strategically important cluster of energy infrastructure, businesses and research facilities. The Energy Hub supplies over 25% of Ireland's energy demands, is home to 20% of Ireland's electricity generating capacity and the country's only oil refinery.

EirGrid is leading Ireland's transition to a low carbon future. As we enhance the electricity system, we are delivering critical infrastructure that underpins greater energy independence, but as importantly, will create a better and sustainable future for the next generation.

SSE is set to invest over EUR900m in Ireland by 2027 alone, building renewable energy assets, flexible power plants and EV charging infrastructure. SSE chief financial officer, ...

In Ireland, the SEM Committee is consulting until 4 October 2024 on DSUs: A Revised Phase 1 Solution for Energy Payments and Other Issues following the previous consultation in 2022 . The SEMC proposes that in the temporary Phase 1, DSUs pay a supplier compensation payment to the Imperfections Charge fund.

RWE is already one of the leading companies in the field of renewable energy. Between 2024 and 2030, the company will invest EUR55 billion worldwide in offshore and onshore wind, solar energy, batteries, flexible generation, and hydrogen ...
