

# Is it reasonable to plant medicinal herbs under photovoltaic panels

Can solar energy be used to produce medicinal herbs?

Mehta et al. (2017) analyzed the drying systems with the solar and open sun drying systems. The quality parameters of the various dried products like vitamins (A,C), polyphenol, and flavonoids were higher with the solar drying system. The application of solar energy in the herbal industry for the production of medicinal herbs is not yet realized.

Do medicinal plants use solar drying?

Medicinal plants information and their usage in therapeutic purposes. Thin layer drying of leaves in solar drying is reviewed. Exergy analysis of the overall solar drying process is presented. Use of thermal energy storage in solar drying is reviewed and presented. Economic analysis for solar drying of herbs are assessed.

Can thermal energy storage be used in solar drying of herbs?

Use of thermal energy storage in solar drying is reviewed and presented. Economic analysis for solar drying of herbs are assessed. Health consciousness has been increasing gradually in the entire world during the last three decades. Naturally and artificially produced medicines are consumed by the people for curing short and long-term diseases.

Do solar photovoltaic panels promote vegetation recovery?

Liu Y, Zhang R, Huang Z, Cheng Z, Lopez-Vicente M, Ma X, et al. Solar photovoltaic panels significantly promote vegetation recovery by modifying the soil surface microhabitats in an arid sandy ecosystem. *Land Degrad Dev.* 2019;30:2177-86. Lovich JE, Ennen JR. *Wildlife Conservation and Solar Energy Development in the Desert Southwest.*

Can solar dryers dry medicinal herbs?

Drying offers improved shelf life, reduced density, and low transportation cost. In recent years, the application of solar dryers for drying medicinal herbs has been explored. In this paper, initially different solar drying methods and dryers, and the factors affecting the performance of them are reviewed and presented.

How to dry medicinal plants?

There are many techniques used for drying the medicinal plants such as sun drying, shade drying, solar assisted drying, freeze drying, microwave drying, microwave vacuum drying, heat pump assisted drying, infrared drying.

The market is flooded with items made from medicinal and aromatic herbs. Plants can be used to produce specialty materials like biocides, cosmetics, medicines, ...
