

Where is Northvolt based?

It will be located in Germany and produce a sufficient amount of batteries for one million electric vehicles. Northvolt announced a plan for its third battery gigafactory - Northvolt Drei, which will be established in Heide, Schleswig-Holstein in northern Germany.

What is Northvolt Drei?

Peter Carlsson, Co-Founder and CEO of Northvolt, comments: "We're excited to announce Northvolt Drei - a project which fits well into a promising future cluster of clean technology ventures emerging in northern Germany and advances the wider European transition towards a sustainable society within which Germany plays a crucial role."

What's it like working at Northvolt Drei?

Nadia: Working on construction at Northvolt is truly exhilarating. We're on a multi-billion Euro project at Northvolt Drei, and it's incredibly rewarding. While it's complex, we have an optimized master plan neatly divided into manageable stages. But here's the thing that sets us apart - our team is something else.

Where is the Northvolt Gigafactory located?

The start of construction of battery gigafactory Northvolt Drei in Heide, Germany, marks a major milestone for Northvolt, and the region as a whole.

When will a 'Northvolt Drei' battery factory be built in Heide?

The aid had been approved by the European Commission in January. Construction of the 'Northvolt Drei' battery factory has begun in Heide. It is set to reach an annual capacity of 60 gigawatt-hours by 2029.

How much money does the 'Northvolt Drei' project cost?

The federal and state governments are supporting the project with approximately 700 million euros and additional guarantees of 202 million euros. The aid had been approved by the European Commission in January. Construction of the 'Northvolt Drei' battery factory has begun in Heide.

Harnessing renewable energy from nearby wind parks, Northvolt Drei embodies a commitment to eco-friendly production practices. With an anticipated annual production ...

On Germany's north sea coast, just north of Hamburg, we are building our third battery gigafactory - Northvolt Drei. Powered with renewable energy, the highly automated factory will produce enough batteries to power one million electric ...

"Northvolt Drei" will use renewable energy from the region's wind power, which had been a key factor in

selecting the site. The factory is expected to create around 3,000 jobs and start production in 2026. Full ...

Northvolt plans to establish a battery gigafactory in Heide, Schleswig-Holstein, northern Germany. The facility, named Northvolt Drei, will have an annual production capacity of 60 GWh, sufficient for one million ...

Northvolt Drei ist das erste in der EU geförderte Vorhaben, dessen Beihilfe auf Grundlage des Temporary Crisis and Transition Framework (TCTF) genehmigt wurde. Jetzt bei Northvolt bewerben. Für unsere Batteriezellfabrik Northvolt Drei suchen wir Mitarbeitende aus vielen verschiedenen Bereichen, unter anderem aus der Bau-, Automobil- und ...
