Large photovoltaic inverter parameter settings

Can LVRT test identify the parameters of a PV inverter?

In the case that the PV inverter control strategy and parameters are not disclosed,a method is proposed to realise the identification of the three types of parametersthrough the LVRT test. The method can solve the difficulty in performing the tests of Groups 2 and 3 parameters in the field.

Can a PV inverter be set to stand-alone mode?

The PV inverter can be set to stand-alone modeand reduce its feed-in power if this is required by the battery state of charge or the energy demand of the connected loads. To do this,use the integrated frequency-shift power control (FSPC). Selecting the PV Inverter You can use the following PV inverters in off-grid systems.

How do I change grid-relevant parameters in the PV inverter?

To change grid-relevant parameters in the PV inverter after the first ten operating hours,you will need a special access code,the SMA Grid Guard code. The application form for this personal access code is available in the download area at ,in the "Certificate" category of the respective PV inverter.

What are the reference values for a PV inverter?

The reference values of the active and reactive currents can be expressed as follows: PDC-VDC curves with r = 0 ? and r = 0.042 ?, respectively. In the failure mode, the PV inverter operates at point G1 (actual operating point) when r = 0.042 ?, and the DC voltage rises by 111 V.

How can I order a PV inverter with preset off-grid parameters?

You can order all the listed PV inverters with preset off-grid parameters from SMA Solar Technology AG. The PV inverters must be equipped with at least the firmware version given in the table, or a higher version. If this is not the case, perform a firmware update (see PV inverter documentation).

Can I use PV inverters in off-grid systems?

You can usethe following PV inverters in off-grid systems. You can order all the listed PV inverters with preset off-grid parameters from SMA Solar Technology AG. The PV inverters must be equipped with at least the firmware version given in the table,or a higher version.
