Could a new solar plant solve the energy crisis in Las Vegas?

But a massive new solar plant, sprawling over 1,670 acres near Las Vegas, was designed to solve that problem. It provides energy on demand, even when it's dark.

Are Nevada Solar plants generating more power?

LAS VEGAS (KLAS) -- Nevada solar plants are generating at least 3.7 gigawatts of power already, and the Department of the Interior is getting closer to moving forward with transmission lines to handle more. Officials gathered in Southern Nevada on Tuesday to highlight significant progress in meeting federal goals for clean energy.

What happened to NV Energy's Solar power plant?

The plant has been operating at 40% to 50% capacity, according to a BLM source. The plant has a contract with NV Energy to produce power to meet demand during the high-demand summer months. The plant was designed to operate for 30 years. A website for the company that owned the plant, Solar Reserve, has shut down.

Where is the largest solar plant in Nevada?

The largest solar plant currently operating in Nevada is just northwest of Las Vegas near the Interstate 15 interchange with U.S. 93 at Apex. The Eagle Shadow Mountain Solar project has a 300MW capacity. There are 16 units in the state producing 100MW or greater, according to GEM. "Currently there are nine solar plant approved projects underway.

Is there a solar glimmer in Las Vegas?

On the far north end of Las Vegas Boulevard, there's a different kind of glimmer that Sin City isn't as well known for. More than 334,000 solar panels glisten in the sun at NV Energy's Dry Lake solar project, harnessing the power of the rays and transmitting it to the power grid for the valley's 2.3 million residents to use.

How many solar plants are there in Nevada?

The Nevada Governor's Office of Energy said Thursday their records show there are 35operational solar plants in Nevada with a total capacity of 3,721 megawatts (MW). That includes smaller plants with less than 100MW capacity.

LAS VEGAS -- Nevada solar plants are generating at least 3.7 gigawatts of power already, and the Department of the Interior is getting closer to moving forward with transmission lines to handle more. Officials gathered in Southern Nevada on Tuesday to highlight significant progress in meeting federal goals for clean energy.
