

What is the Bess development roadmap?

The BESS development roadmap proposed in this chapter calls for increased activities in FSM,RMI,and TUV's energy ministries<sup>42</sup> responsible for preparing national/regional BESS targets and policies,and utilities<sup>43</sup> responsible for supplying electric power to consumers.

Why do we need a Bess development roadmap for PICS?

This is especially the case when the country lacks robust energy policy or market frameworks. This report aims to address these critical issues by creating a BESS development roadmap for PICs. Even with strong climate and energy targets,BESS development is hampered by limited policy and market frameworks.

What are the main stakeholders and market arrangements for Bess development?

Main stakeholders, market arrangements, and possible frameworks for BESS development are reviewed after a brief overview of PICs total electricity generation, total installed power generation capacity, renewable electricity capacity, share of renewables in the power mix, and electricity access.

Why is Bess development hampered by limited policy and market frameworks?

Even with strong climate and energy targets,BESS development is hampered by limited policy and market frameworks. The absence of policy and market incentives is detrimental for long-term financing required for energy infrastructure projects like BESS since there are no mechanisms that reduce risks for private financing.

What is Bess development in Jeju?

BESS development in Jeju has been driven by policy measures to meet the CFI 2030 targets. In 2014,the provincial government announced the Wind+ESS measure,stipulating that all wind power plants must install BESS equal to or greater than 10% of the plant's generation capacity.

Why is Bess a supporting technology?

Because BESS is a supporting technology,rather than an energy generation technology,the proposed policies and market mechanisms are highly related to energy generation- renewables,in particular.

The Government of the Republic of Marshall Islands has been provided with grant funding by the World Bank (WB) for a Sustainable Energy Development Project (SEDeP) aimed at increasing the share of renewable energy from 2% to 9% and to improve power ...

The Asian Development Bank (ADB) and RMI have an agreement for a USD 7 Mn grant to support the Marshalls Energy Company (MEC) in improving its energy network and to shift towards renewables.<sup>15</sup> The World Bank has extended an investment of USD 34 Mn for promoting renewable power generation in the country.<sup>16</sup>
