How much does a tewaycell battery cost?

Last quote I got from Docan was \$131.25/cell shipped out of China and \$147/cell shipped out of Houston. That compares with the current price on AliExpress for the cells I purchased from Tewaycell Battery Store which is \$143.41/cell shipped out of China.

Are tewaycell cells swollen?

There are many people that have gotten very slightly swollen cells from reputable companies. These cells do not look all that bad, but I won't make a judgement on their quality. Although I purchased cells from Tewaycell, I do not condone their practice of selling these as 310ah (or 320ah at other stores).

My Docan Technology EVE cells are all perfect. I have many of them charged and will top balance when I'm done. I'm not testing every one. I just picked a random one. It tested out at 287AH - well surpassing the 280ah rating. I have no doubt the others would give similar results. I'm limited by my charging ability here.
