

Purified by-product hydrogen from the Soci t  Anonyme de Raffinerie des Antilles (SARA) refinery on Martinique is being used as feedstock for the fuel cell system. The electricity generated by the system is then supplied to the island's electric grid, supporting an energy diversification strategy.

Martinique: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page ...

The plant, located in Bellefontaine, in the west of Martinique, has a capacity of 220 MW and covers around 60 percent of the island's power needs. The project involved the expansion of ...
