

LOS ANGELES -- Electric car pioneer Tesla Motors (IW 500/384) unveiled a "home battery" Thursday that its founder Elon Musk said would help change the "entire energy infrastructure of the world."

The CEO of electric car maker Tesla Motors hopes to park hundreds of millions of large, solar panel-connected batteries in homes and businesses so the world can disconnect ...

Tesla Motors" Elon Musk has announced a new home battery that could take your home off the grid. The battery will use Tesla's own lithium-ion battery technology and will act as a battery backup and energy storage device.

The new Tesla Powerwall battery, which can clearly be used for either home or business use, is one more notch in the belt for Elon Musk. It's a wall-mounted rechargeable ...

Robin Zeng, the founder of the world's largest EV battery company, says Tesla CEO Elon Musk's big bet on 4680 cylindrical cell technology "is going to fail and never be successful."

Tesla Motors CEO Elon Musk unveiled a line of home and industrial battery packs late Thursday, representing a strategic shift as his money-losing electric ca...

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can use this energy to power the devices and appliances in your home day and night, during outages or when you want to go off-grid. With customizable power modes, you can optimize your stored energy for outage protection, electricity bill savings and ...

Robin Zeng, the founder of the world's largest EV battery company, says Tesla CEO Elon Musk's big bet on 4680 cylindrical cell technology "is going to fail and never be ...

CATL founder and chairman Robin Zeng apparently told Tesla CEO Elon Musk that he basically sucks at making batteries. Musk's reply: silence.

The new Tesla Powerwall battery, which can clearly be used for either home or business use, is one more notch in the belt for Elon Musk. It's a wall-mounted rechargeable Lithium-ion battery...

The lithium-ion battery modules can store electricity from solar panels and serve to balance loads from the grid, charging up during non-peak energy usage hours, then providing energy to a home...
