

Mexico saimai solar

Is solar PV a viable energy source in Mexico?

Solar PV was successful in both, securing 1,691 MW of the 2,085 MW auctioned in the first and 1573 MW of 3473 MW in the second auction. In 2013, 22% of the installed electricity generation capacity in Mexico was from renewable sources. The majority, 18.1% coming from hydroelectricity, 2.5% from wind power and 0.1% from solar PV.

Is Mexico a good market for solar PV?

Moreover, Mexico has emerged as one of the top markets for solar PV in recent years, owing to its aggressive deployment of solar PV plants that were awarded in the first three long-term auctions (LTAs) during 2015-2018. The country touched the GW mark in 2018 for the first time, with 2.7 GW newly installed capacity in the same year.

Does Mexico need solar power?

The solar irradiance levels and the continued focus on corporate sustainability will also continue to support strong demand for solar power in Mexico. Contact us to learn more about accessing low-cost solar power in Mexico. Savings from on-site solar can range between 20% and 40% with no upfront costs. Contact us today.

Is solar energy a good investment in Mexico?

Solar resources in Mexico are among the best in the world, with annual daily solar irradiance levels ranging between 4.4 kWh/m² and 6.3 kWh/m². With the country's solar capacity reaching 10GW at the end of 2021, we expect solar energy to continue to present attractive opportunities for project developers and industrial consumers.

What is distributed solar energy in Mexico?

Distributed energy in Mexico is classified as any system with a capacity below 500 kW. The National Association of Solar Energy (ANES from the Spanish acronym) reported approximately 21,600 interconnection permits for distributed solar in 2015.

How much does solar energy cost in Mexico?

As of August 2019, average solar energy systems in Mexico cost USD 3.02 per watt, which is less than the average price of solar systems in the United States, which is around USD 3.34 per watt. As of 2018, more than 100,000 roofs on commercial buildings, industrial buildings, and homes have distributed solar PV installations.

All of our solar engineers and panel installers are trained specifically for this trade and will ensure your solar power system is installed at the highest efficiency to produce thousands of dollars in energy savings. Contact us today for a free quote tailored to your particular needs.
