

# Mtn lumos solar Puerto Rico

Does Puerto Rico have solar energy?

As a result of this progress, Puerto Rico now ranks seventh among all U.S. states and territories in residential solar energy adoption per capita, according to net metering data from the U.S. Energy Information Administration (EIA).

Who owns solar power in Puerto Rico?

Luma Energy became the operator in Puerto Rico in 2021, replacing the Puerto Rico Electric Power Authority (PREPA) in that role. The company launched an accelerated solar connection program that the company says provides customers with shorter wait times for approval.

Does Puerto Rico have a photovoltaic system?

When the day is cloudy, during the night and when it rains, the photovoltaic system produces no or very little current. The appliances do not tolerate this variability in the current, so these deficits must be supplemented with current from the Puerto Rico electrical system, or using energy stored in batteries.

Why does Puerto Rico need a modern electricity system?

The modernization of Puerto Rico's transmission and distribution system is critical to increased reliability and resilience, as well as to transform the electricity grid into a flexible, modern, smart platform leveraging renewable energy for our 1.5 million customers. About LUMA

Since assuming operations of the transmission and distribution system in June 2021, LUMA has been working closely with the Puerto Rico Energy Bureau (PREB) to accelerate the adoption of home solar and empower the growth of renewable energy across Puerto Rico.
