

# New Zealand tricera energy

What is Tricera energy?

TRICERA energy offers customized battery storage systems made from new and used batteries, including batteries from the automotive sector. Our systems enable you to optimize your energy use from fluctuating renewable sources. The service life of batteries is usually limited to a few years.

What can Tricera do for You?

TRICERA is currently developing over a dozen battery storage projects in Germany and around the world. We offer flexible designs, ranging from stand-alone energy storage to combinations with photovoltaic or wind energy systems for energy generation. TRICERA solutions can also be used for energy trading and grid stabilization.

Why is New Zealand transitioning to a highly renewable electricity system?

New Zealand is transitioning to a highly renewable electricity system. This change will require increased and accelerated investment in new electricity generation to match demand growth and the retirement of thermal power plants.

What are Tricera storage solutions?

TRICERA storage solutions are ideal complements to PV plants, heat pumps and charging station management in commercial and industrial contexts. Our commercial and industrial storage systems (C&I storage systems) come as two standardized models. Combine them by simple plug & play to increase your capacity.

What percentage of New Zealand's electricity is generated by geothermal?

Data from the Ministry of Business, Innovation and Employment (MBIE) reveals that 60% of New Zealand's electricity in 2023 was generated through hydropower, 18% through geothermal, 9% through gas, 7% through wind and just over 2% from coal. The early 2010s saw an uptick in investment in renewable energy projects, particularly in geothermal assets.

How does electricity supply work in New Zealand?

Supplying electricity to homes and businesses across New Zealand involves three key elements: generating electricity, transporting electricity to distribution companies, and then selling it to customers.

With its unique resource base, New Zealand is a success story for the development of renewable energy without government subsidies. Geographically isolated, the country has also developed robust policies for security of supply. ... New Zealand 2006 Review. Energy Policy Review. Country report -- May 2006 . The Energy Mix.
