Savannah Tarka Wind Power Station is expected to add 600 GWh of clean electricity annually to the electric grid of Niger. This will save the country over 400,000 tonnes of carbon dioxide emissions every year. This projects is expected to create 500 jobs during the construction phase. [1] ...

This will be the first wind power plant in Niger Republic, and will be one of the largest in Africa. The proposed wind power plant, the Parc Eolien de la Tarka, will be located in the Tahoua region of southern Niger, and is expected to ...

D'une capacit  de 250MW, le Parc  olien qui sera  rig  dans la zone de Tarka (Tahoua-Zinder) viendra renforcer la production  lectrique au Niger   l'horizon 2025 avec une production annuelle pr vue de 600 Gwh que le pays pourra exporter vers les pays voisins gr ce au projet d'interconnexion sous-r gional WAPP de la C d ao.

Se d veloppent notamment des "turboliennes", contraction de turbine et  olienne,   jucher sur les toits, puissantes et silencieuses, munies d'un double rotor, et dont l'un des prototypes a  t  valid  par le CEA et l' cole polytechnique. Apr s des d cennies de vents contraires, l' olien semble prendre un nouveau souffle.

African-focused energy company Savannah Energy PLC is planning to build an up to 250-MW wind farm in Niger for which it just signed an agreement with the country's ...
