Get the power of OpenSolar, all within your existing CRM or business management software. The Open API gives your system direct read/write access to your OpenSolar data, so you can use it however you need to help your business grow. Lead Import - automatically create a project in OpenSolar each time a lead is created in your system

Hi there, Thank you for reaching out. You can delete a project by going to the info tab of the project and scrolling all the way to the end of the page where you will find the "delete project" button.

OpenSolar provides class-leading solar design accuracy, customer proposals and end-to-end tools to manage and grow your solar business, free. Features Accurate 3D design

When designing solar systems, your client may have an existing solar system installed. OpenSolar gives you the capability to quickly and easily accommodate this if they would like to upgrade their system with more hardware. The first step in adding to an existing system is creating the system the customer already has on their home.

In Monaco, it is possible to capture the energy of the sun in two ways: using photovoltaic panels, which transform sunlight into electricity, and with thermal panels, which use the energy ...
