

# Palestine maxxim energy solutions

Is the energy sector in Palestine a unique situation?

The energy sector, specifically electricity in the State of Palestine, is in a unique situation.

Can a new pilot model transform energy challenges in Palestine?

UNDP is suggesting a new pilot model for future testing, scaling up, and replication in order to transform energy challenges in the State of Palestine into promising opportunities. An overarching proposal is to encourage Local Governance Units (LGUs), especially in villages and towns, to invest in solar energy with medium-scale photovoltaic farms.

What will UNDP do if the Palestinians don't get solar energy?

UNDP will continue its efforts to keep the sustainable-energy agenda for the Palestinian people as its priority and will increase its advocacy and lobbying efforts to test new solutions even as it increases investment in solar energy through its various development interventions.
