

Photovoltaic steel support sheep shed

Can solar panels be used on steel buildings?

Solar panels on steel buildings mainly use photovoltaic arrays combined with steel structure building roofs and walls to generate solar power, which has outstanding energy and land-saving advantages.

Why do sheep need a lambing shed?

A well-designed lambing shed can have a huge impact on productivity and animal welfare. Lambing in a shed can help to reduce mortality rates by protecting sheep from predators and reducing stress. Adequate housing protects animals from cold weather and draughts, which can otherwise lead to pneumonia.

Why should you choose a custom-built sheep building?

Managing the sheep more easily in terms of movement and shearing providing shade and doubling as storage in the summer months. For a custom-built sheep building that's designed around the needs of you and your animals, our experienced team of designers, fabricators and buildings have got your back.

Should you design a sheep shed or consider lambing indoors?

When designing your new sheep shed or considering lambing indoors there is a lot to consider, in this article we look at the different considerations we advise when designing sheep sheds. Lambing survival rates are most successful when born in indoors, however some farmers may dispute the most natural way is outdoors.

What types of sheep housing solutions are available?

In this blog, we look at the sheep housing solutions we have available when designing your sheep shed, along with the requirements that need to be considered. We will be covering sheep slats, walkthrough troughs, sheep feed barriers and drinkers.

Why should you choose a sheep & lambing building?

Sheep and lambing buildings are designed to be low level and simple to maintain. Because our designs are custom-made for you, they're easy to adapt - if you need to extend the shed in the future, you know who to call. Your building can easily be designed for more than one purpose, like a hay or machine store in the warmer months.
