

Pitcairn Islands buying a solar system for your home

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Can you build a new home on Pitcairn?

Building your new home on Pitcairn gets you a residence permit that's good for two years. You won't have to go through the application process again when the residence expires, but your application will be reviewed before granting you the renewal. The key is to prove you intend to reside on the islands permanently.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.
