

What is EnerSys powersafe SBS 40?

Terminal design - leak resistant patented dual seat terminal design The EnerSys PowerSafe SBS 40 batteries provides a superior range of valve-regulated batteries with an extended service life in energy dense configurations.

What are powersafe SBS batteries?

Manufactured to the highest international standards, PowerSafe SBS batteries offer outstanding performance in both float and cyclic applications. The high energy density of these batteries makes them ideal for system upgrades or reduced installation footprint, while still delivering dependable backup protection.

What is powersafe SBS technology?

PowerSafe SBS Technology monoblocs and cells retain the long float characteristics of standard PowerSafe SBS batteries, with the added benefit of improved cyclic ability in both float voltage and fast charge applications.

What is the maximum operating temperature of a powersafe SBS battery?

The maximum operating temperature of the PowerSafe SBS J battery series can be extended to 80°C via an optional metal jacket. PowerSafe SBS batteries are designed for use in cabinets or on stands, close to the point of use. A separate battery room is not required

Where are powersafe SBS batteries marketed?

PowerSafe products are marketed under the SuperSafe brand in the following specific countries - India, Indonesia, Malaysia, Singapore, Thailand, Australia and New Zealand. Featuring advanced Thin Plate Pure Lead (TPPL) technology, PowerSafe SBS batteries deliver long life, high energy density and superior shelf life for telecommunications.

Does powersafe SBS accept unlimited current during recharge?

Due to the very low internal resistance, PowerSafe SBS monoblocs and cells will accept unlimited current during recharge but for cost and practical purposes in float applications where recharge time to repeat duty is not critical, the rectifier current can be limited to the load plus 0.1C 10 Amps.
