????????????,????????,????????????? ...

Rimac Energy announced its plans to enter the ESS market in Spring 2023 and first presented its SineStack battery energy storage system (BESS) product at our publisher Solar Media's Energy Storage Summit Central Eastern Europe (CEE) in September 2023, officially launching it a month later.

SineStack guarantees a cost-effective and simplified expansion. Featuring a usable capacity of 790 kWh and a 400 kVA output (400 Vac 3-ph), it's modular and scalable, offering unmatched ...

This is Rimac's first move into the stationary energy storage market, their first product is the SineStack. The interesting aspects of this design is the integrated inverter, active balancing and the ability to switch the load on a module basis to extend the working lifetime.

SineStack guarantees a cost-effective and simplified expansion. Featuring a usable capacity of 790 kWh and a 400 kVA output (400 Vac 3-ph), it's modular and scalable, offering unmatched flexibility.

Croatia-based Rimac Energy, a pioneer in highly integrated battery energy storage and power delivery systems, has announced that its first SineStack is now ready for deployment to a site in Colchester. SineStack incorporates game-changing power conversion technology that is highly integrated both physically and functionally with its battery cells.

This is Rimac's first move into the stationary energy storage market, their first product is the SineStack. The interesting aspects of this design is the integrated inverter, active balancing and the ability to switch the load on a module basis ...

SineStack's compact design maximizes revenue per square meter, while integrated power conversion and liquid thermal management optimize battery use and extend lifetime. ...

This is Rimac's first move into the stationary energy storage market, their first product is the SineStack. The interesting aspects of this design is the integrated inverter, ...

Rimac Energy, the energy storage arm of electric vehicle (EV) technology company Rimac, has completed commissioning for its flagship SineStack, a grid-interfacing battery energy storage system (BESS).

The unit, called SineStack, is a lithium iron phosphate (LFP) cell-based modular BESS solution with an energy storage capacity of 790kWh and a 400kVa output. The product's core differentiating feature is its distributed inverter topology architecture, sometimes called an "AC battery", where the inverter capability is distributed amongst ...

This is Rimac's first move into the stationary energy storage market, their first product is the SineStack. The interesting aspects of this design is the integrated inverter, active balancing and the ability to switch the load on a module basis to extend the working lifetime. Specifications: <https://>

Rimac Energy announced its plans to enter the ESS market in Spring 2023 and first presented its SineStack battery energy storage system (BESS) product at our publisher Solar Media's Energy Storage Summit ...

The unit, called SineStack, is a lithium iron phosphate (LFP) cell-based modular BESS solution with an energy storage capacity of 790kWh and a 400kVa output. The product's core differentiating feature is its ...
