

Sante solar Liberia

What is the sustainable power source in Liberia?

In Liberia, sustainable power is harnessed from tight-knit communities to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

Did Power Africa grant a solar energy project in Liberia?

Power Africa, through the United States Agency for International Development (USAID) awarded grants totaling \$669,330 to five solar energy companies operating in Liberia.

What makes Santé a good solar company?

By absorbing all the custom details, requirements, priorities, and challenges that 1,000-plus unique solar projects presented, Santé knows how to deliver cost-effective solutions that will result in the highest quality operating assets for solar companies and utilities. Engagement through Letter of Intent with Professional Service Fees

Why is electricity important in Liberia?

Electricity is important in Liberia because it creates opportunities, such as learning, communication, starting a business, and building a better life. Unfortunately, less than 1% of rural Liberians have access to electricity. However, reliable, safe electricity is now affordable for nearly anyone. LIB Solar focuses on mobilizing communities instead of selling to individual customers to achieve economies of scale.

How many people in Liberia have access to electricity?

Fewer than 1% of rural Liberians have access to electricity. LIB Solar focuses on providing reliable, safe electricity to these communities by mobilizing communities instead of selling to individual customers. Each community receives high-quality solar systems that provide lighting and phone charging.

Why should we scale PUE in Liberia?

Scaling PUE in Liberia is a way to alleviate the energy shortfall and enhance efficiency at the same time. These grants seek to scale sustainable business models to make more PUE products available on the Liberian market, stimulate demand for the products, and test several business models to supply clean energy.
