

# Schneider electric microgrid Dominican Republic

Is Schneider Electric a good microgrid integrator?

In the Guidehouse Insights 2023 Microgrid Integrator Leaderboard, Schneider Electric received the highest score for all these capabilities and was ranked the No. 1 microgrid integrator. In sum, Guidehouse found that Schneider's long history, technology portfolio, and continuing innovation in microgrids set us apart.

Will the energy grid become a grid of microgrids?

Some energy futurists see the grid eventually becoming a grid of microgrids. For now, the concept of connecting microgrids is still in its infancy. The most notable is a project underway by Commonwealth Edison in the Bronzeville area of Chicago. The project featured here, a community being developed by KB Home, is also worth watching.

Could microgrids be an alternative to grid resilience upgrades?

The company is considering microgrids as an alternative to part of \$9.6 billion in grid resilience upgrades. One project under consideration is a 17.5-MW microgrid connected to a utility substation that would serve 30 industrial companies, about 70 government entities, about 300 commercial businesses and about 2,200 residential customers. 5.

Will Duke Energy install a microgrid at MCB Camp Lejeune?

A \$22 million microgrid at Marine Corps Base (MCB) Camp Lejeune, the largest Marine Corps installation in the world, is one example. Duke Energy will install the microgrid to support the critical education and training facilities at Camp Johnson, home to the Marine Corps Combat Service Support Schools at MCB Camp Lejeune. 11.

Does Taylor Farms have a microgrid?

But like OhmGrid (see #3), Taylor Farms is going entirely off grid with its microgrid. A major California fresh food producer, Taylor Farms is building a microgrid in partnership with Bloom Energy, Ameresco and Concept Clean Energy. 7. New off-grid microgrid to power Central Valley cold storage facility for almond industry

Schneider Electric has started construction on a \$12.2 million microgrid project that will provide reliable, zero-emissions electricity for the port's Joint Command and Control Center. 23. Dominican Republic villages seek to electrify ...

The microgrid is expected to be deployed by February 2023 and after a year, it will be operated by the local utility, Edesur Dominicana. The move to clean microgrids reflects a growing acceptance of renewable energy in the Dominican Republic, Espinal said.
